PROFESSIONAL SUMMARY

Data Analyst who turns numbers into narratives and datasets into decisions — skilled in SQL, Python, Power BI, Tableau, and Excel. Driven by a passion for spotting hidden patterns and building dashboards that make insights impossible to ignore, backed by a strong programming and problem-solving mindset.

EDUCATION

Vignan's Institute of Information Technology Bachelor of Technology in Computer Science and Engineering (Cyber Security), CGPA:9.3	2023- 2027 Visakhapatnam, India
Sri Kanya Junior College Board Of Intermediate Education – 12 th Grade, CGPA:9.8	2021- 2023 Visakhapatnam, India

WORK EXPERIENCE

Power BI Intern MS Elevate	Feb 2026-Mar 2026 (Live Link)
- Analysed 10,000+ job records, using Excel (cleaning, deduplication, formatting), resulting in 25% improvement in data accuracy; conducted EDA across 6+ industries to identify hiring and salary patterns. - Built Power BI dashboards (15+ visuals, 5+ KPIs) using data modelling, resulting in 50% faster insight generation for analysing job demand, salary trends, and skill distribution.	

PROJECTS

AppOcean – Kimball Data Warehouse for App Store Intelligence SQL Server · ETL · Data Warehousing	(Live Link)
- Architected a Kimball star schema DW on SQL Server with 120,500+ records across 5 dims and 1 fact table, loading 6 CSV sources via a 2-stage ETL pipeline using stored procedures with TRY-CATCH error handling. - Identified and resolved 13 data quality issues — NULL values, mixed casing, hidden CHAR(13) characters, and negative discounts — then validated Staging vs DW accuracy using UNION ALL comparison queries. - Delivered 6 data mart views and 30+ analytical queries using LAG, DENSE_RANK, CTEs, and window functions — surfacing KPIs like ARPU, uninstall rate, and discount ROI for Marketing, Finance, and Executive teams.	
Silent Drift – Customer Churn Detection SQL · BigQuery · Looker Studio	(Live Link)
- Engineered BigQuery SQL data pipeline cleaning 1,05,000 records, resolving 15+ data quality issues including duplicates, invalid fields, and negative spend; enabling accurate churn analysis across 89,075 customers and ₹1.92B revenue. - Designed rule-based RFM churn risk scoring model segmenting 89,075 customers into 5 behavioural cohorts; discovered 365+ day inactive customers churn at 54.48% vs 16.47% — a 3x risk gap revealing recency as the strongest churn predictor - Quantified ₹543.6M revenue lost to silent churn (28.1% of ₹1.92B), flagged 9,069 high-risk customers with ₹9.84M at immediate risk; delivered 3-page Looker Studio dashboard driving targeted retention strategy.	
Decoding the Green Squares – GitHub Bot & Fake Profile Detection Python · Pandas · Matplotlib · Seaborn	(Live Link)
- Cleaned 1,05,000 GitHub profiles across 21 columns using Python and Pandas, resolving 72,000+ dirty values; engineered 9 behavioural features including follow ratio, commit frequency, and suspicious hours to enable bot detection analysis. - Built rule-based suspicion scoring model using 7 weighted red-flag signals; discovered README quality as strongest bot predictor (-0.74 correlation) and flagged 66.09% of bots committing at 12am–4am vs 0.012% genuine users. - Flagged 34,699 suspicious profiles (34.08%) out of 1,01,807 including 9,124 profiles triggering all 4 red flags with 100% detection rate; delivered 18 visualizations using Matplotlib and Seaborn driving actionable authenticity insights.	

TECHNICAL SKILLS

Languages : SQL (My SQL,MS SQL Server), Python, Java.	Analytics & BI : Power BI, Tableau, MS Excel.
Tools : SQL Server, BigQuery, Looker Studio, Jupyter Notebook, VS Code.	Libraries : Pandas, NumPy, Matplotlib, Seaborn.
Concepts : Dashboard Development, ETL Pipelines, Medallion & Kimball Architecture, Star Schema, Data Warehousing, DSA	

CERTIFICATIONS & ACHIEVEMENTS

Certifications : IBM(SQL, Data Fundamentals) | Deloitte (Data Analytics Job Simulation) | Hacker Rank(SQL)

Achievements :

- Solved 500+ problems on [LeetCode](#) — 70+ Database and 450+ DSA problems across Java & Python.
- Ranked **#1** in department (2023–2027 batch) at Vignan's Institute of Information Technology with a **9.74 CGPA**.
